## **Information for International Students\*\*\***

Click [here](#) for information on Curricular Practical Training (CPT) and Optional Practical Training (OPT)

International Students may engage in Curricular Practical Training (CPT) internships (which can be paid) under certain conditions. The internship must be related to the student's degree and the student must receive some kind of credit for the internship. ("DEPT" 3800 internship course). For CPT, students must have completed their first year at university and they must apply for authorization on their student visa and receive an updated I-20 form before they can begin their internship.

Optional Practical Training (OPT) is designed to permit international students to gain practical experience in their major field of study. The U.S. Department of Homeland Security (DHS) permits international students to gain this experience either before or after graduation, but restricts the total amount of time to 12 months.

To qualify for optional practical training before graduation, an F-1 student must have been in lawful status for nine consecutive months. Students may engage in optional practical training before graduation during vacation periods or during the academic year. The training is limited to part-time (20 hours per week) while school is in session. Students may work full-time (40 hours per week) during vacation periods.

\*\*\*Obtaining permission to engage in optional practical training before graduation takes two to three months because students must obtain an Employment Authorization Document (EAD) from DHS.
