Microsoft Authenticator

Start by getting the app

On your phone, install the Microsoft Authenticator app. [Download now](#)

After you install the Microsoft Authenticator app on your device, choose "Next".

Cancel

Next

2. Remain on the **Set up your account** page while you set up the Microsoft Authenticator app on your mobile device.

Microsoft Authenticator

Set up your account

When prompted, allow notifications. Then add an account, and select "Work or school".

Back

Next

3. Open the Microsoft Authenticator app, select to allow notifications (if prompted), select **Add account** from the **Customize and control** icon on the upper-right, and then select Work or school account.

Note: The first time you set up the Microsoft Authenticator app, you might receive a prompt asking whether to allow the app to access your camera (iOS) or to allow the app to take pictures and record video (Android). You must select **Allow** so the authenticator app can access your camera to take a picture of the QR code in the next step. If you don't allow the camera, you can still set up the authenticator app, but you'll need to add the code information manually. For information about how to add the code manually, see [Manually add an account to the app](#).

4. Return to the **Set up your account** page on your computer, and then select **Next**. The Scan the QR code page appears.

Microsoft Authenticator

Scan the QR code

Use the Microsoft Authenticator app to scan the QR code. This will connect the Microsoft Authenticator app with your account.

[Can't scan image?](#)

[Back](#) [Next](#)

5. Scan the provided code with the Microsoft Authenticator app QR code reader, which appeared on your mobile device after you created your work or school account in Step 6.
6. The authenticator app should successfully add your work or school account without requiring any additional information from you. However, if the QR code reader can't read the code, you can select **Can't scan the QR code** and manually enter the code and URL into the Microsoft Authenticator app. For more information about manually adding a code, see [Manually add an account to the app](#).
7. Select **Next** on the **Scan the QR code** page on your computer. A notification is sent to the Microsoft Authenticator app on your mobile device, to test your account.

Microsoft Authenticator

Let's try it out

Approve the notification we're sending to your app.
